With the patronage of:

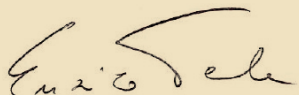

Following the outstanding success of last year's inaugural event—both in terms of attendance and the high scientific level of speakers and discussions—we are pleased to announce an even more ambitious edition this year. The **2nd MEDITERRANEAN MEETING ON SPINAL DEFORMITIES** will take place in **Naples** at the Royal Continental Hotel from October **2nd** to **3rd**.

The meeting will feature increased participation from across North Africa, the Middle East, and several European countries bordering the Mediterranean.

One of the unique features of this congress is its ability to bring together spine surgeons from countries bordering the Mediterranean Sea but located across three different continents. These specialists represent diverse historical and cultural traditions in the treatment of spinal deformities and spine pathologies. This diversity creates a truly unique opportunity for scientific, human, and cultural enrichment, fostering the exchange of knowledge and perspectives that are rarely united in a single event.

The event will bring together some of the most respected spine surgeons specializing in deformities and complex spinal surgery. New sessions will focus on particularly relevant and timely topics, including surgical approaches, technology, techniques, and outcomes in complex spine surgery. The meeting will also include lectures and complex surgical case presentations, encouraging in-depth discussion among attendees.

The meeting will once again be held in the beautiful city of Naples, internationally renowned for its art, history, and rich musical, culinary, and artisanal heritage.
