The **Mediterranean Meeting on Spinal Deformities** is now in its third edition. The 2026 meeting will feature increased participation from across North Africa, the Middle East, and several European countries bordering the Mediterranean. We will be hosting also faculty from North America and Japan, with dedicated sessions focusing on comparing surgical approaches to common deformities in different parts of the world.

One of the unique features of this congress is its ability to bring together spine surgeons from countries bordering the Mediterranean Sea but located across three different continents. These specialists represent diverse historical and cultural traditions in the treatment of spinal deformities and spine pathologies. This diversity creates a truly unique opportunity for scientific, human, and cultural enrichment, fostering the exchange of knowledge and perspectives that are rarely united in a single event.

The meeting will once again be held in the beautiful city of Naples, internationally renowned for its art, history, and rich musical, culinary, and artisanal heritage.

The meeting features lectures and complex surgical case presentation with extensive discussion from the attendees.
